

Packing the City Select Lux in MS2-BAG

Step one.

Place the frame and wheels into the bag. Note the wheels don't go into the wheel pockets when fitting with both seats. However, we would recommend wrapping the metal wheel pins in a towel or something to provide cushioning as they are loose in the bag with the stroller seats/fabric.

Step Two.

Place first seat over the frame.

Step Three

Place second seat towards the centre of the bag. Ensuring the seat adapters are not overlapping.

Step Four

Zip up the bag. Ensure the bag extension is fully zipped out. And noting that it is a tight fit with both seats.
